EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eric Hyman on 4-27-09.

The application has been amended as follows:

In the claims:

Claim 77 has been canceled.

2. The following is an examiner's statement of reasons for allowance: None of the prior art of record taught the controlling of the feed means which included motor driven unwinders for feeding multiple sheet structures and associated motors for sequentially controlling the unwinders in brake mode in order to manufacture an electric energy storage device having minimal internal stresses wherein the multiple sheet structures are laminated after unwinding and then the resulting laminate is wound up to form the electric energy storage assembly. The reference to PCT WO 01/84659 clearly taught the arrangement of layers including a current collector, a cathode based on filled polymer a solid electrolyte based on filled polymers and a lithium metal anode in the form of this sheets. While the reference did not expressly state that these layers were wound flat, winding flat in the construction of a battery assembly was well known to

those skilled in the art as evidenced by the prior art of record as well as Goto (newly cited).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
